

APPRENTICESHIP QUALITY FOR A RESILIENT WORKFORCE

Jasen Jones

Jasen Jones is Director of Workforce Strategies and National Partnerships at ACT. Jasen's career spans radio broadcasting, economic development, and workforce development across Southwest Missouri. . Jasen hosts ACT's Ready for Work podcast and brings his mission to a national scale of connecting communities with hope and prosperity.

The boost in apprenticeship resources and momentum comes with higher expectations for experiential programs to improve completion rates and strengthen alignment to real-time skills. Apprenticeships seeking higher levels of quality and completions may consider nine components for improvement. Each element provides scalable options on a spectrum of good-better-best, backed with best practice examples, case studies, and success stories.

Learning Objectives:

- Methods to enhance competency models and work process schedules
- Tools to solidify linkages of apprenticeships to entry and exit learning outcomes
- Customizable benchmarks for employers to aide in selection and evaluation
- Integrations to improve credential readiness in career and training pathways
- Replicable resources for program launch of improvement of existing programs
